

# Environmental Policy

At Campania Foods, we are fully committed to implementing our Environmental Policy throughout our business.

Our wide range of products are sourced from across Europe and in doing so we endeavour to minimise the impact on the environment as much as possible. All our products are transported by land and sea; none of our products are transported using air freight.

We are in constant discussion with our suppliers in order to reduce the amount of packaging materials used on our products and encourage the use of recycled packaging wherever possible.

In order to minimise the impact the transportation of our goods may have on the environment, we liaise with both our suppliers and customers to ensure that the vehicles used to transport the goods are maintained in good condition. We ensure that each vehicle is appropriately filled and that the routes are carefully planned to reduce excessive mileage.

It is our policy to re-cycle the materials used in our offices wherever possible. All paper, card and ink cartridges are re-cycled through registered, responsible operators.

We are committed to reviewing our policy on a regular basis to ensure it remains effective. This policy is communicated throughout the company and is understood by all staff.
